**First, Are You “Satisfied”
With Your Income
Currently?**

Do You “Regularly” Get Big
Pay Raises **Every Year** At
Your Job, Where You Work Or
Your Personal Sources Of
income?

Or **Do You Work So Many
Hours, You Have No TIME
To Enjoy ALL The Money
You’re Earning?** Your Family
Gets To Enjoy The Vacations
For You. How Fair Is That?

**What If You Could Have
More Time And More
Money?** What If We Had A
Way. [READ MORE.](#)

Also, **Has the thought ever
entered your mind to begin
a business of your own,
But On Your Terms. Time
Flexibility, Bonus
Incentives, Benefits, ALL
On Your Terms.**

Still have dreams and bucket list items to check off YOUR list, **KEEP READING....**

Would you like to explore a "simple" business you can call your own? **BUT, utilize a proven system or program, develop in your spare time, keep your job or business and have something on the side that has the potential to outpace your own business profits and or current salary.**

We are looking for the perfect customers and business partners.

Would you be willing to explore with an open mind for one hour on a zoom virtual meeting with us?

What Is The Biggest Lesson Covid-19 Or the Coronavirus Taught You?

Every Single Person On Planet Earth Knows What This Virus Is...

Everyone Of Us Is Affected By This Virus.

Let us chat briefly through the words on these pages. **Below Are 10 DO's & DON'Ts "Before" You Decide On Implementing ANY Multiple Stream Of Income Strategy.**

What happens if something like this happens again?

Were You prepared for this 2020 pandemic and will you be prepared for the next one? Do you think a pandemic can happen again? Do you think you can be better prepared?

And finally, what lesson did Covid-19 or the Coronavirus teach YOU?

HERE IS WHAT WE THINK IT TAUGHT YOU AND EVERYONE ON OUR GREAT PLANET.

NEVER NEVER HAVE ONLY 1 SOURCE OF INCOME!

Let's go over 10 areas We have discovered over a 23 year career in business that we think can give great perspective moving forward.

- (1.) The 1st way anyone can increase their income and possibly add a multiple stream of income is simply getting a second or third job. Simply work for 2-3 or more than 1 employer and in different industries. One obvious disadvantage to this scenario is your time.

You only have so much time in your day. Yes Or Yes? My suggestion is to dedicate another small amount of hours to other employers. Say 2-10 hours a week. Or propose with your talents to **split your time between 3 different employers in three non competitive industries.**

For example, Virtual assistant, bookkeeping for the elderly, administrative job, shopping for other friends and family, dog walker are some ideas. Hey it's not going to make you a millionaire but it could give you a slight raise and help your household. There are some pros and cons of course like anything. Your free time will be sparse.

Your life could become out of balance. You still have personal chores and responsibilities to handle at home. **Don't forget to fit in fun and mental well being activities and balance your days. You don't want to feel burned out and exhausted.**

Stay healthy. Let's look at 9 other areas to discover.

- (2.) You could **buy a proven business model with a track record like Mcdonalds, Dunkin Donuts,** etc., but these ventures require big capital outlay \$\$\$\$!!! Got a spare million lying around the house? If you do it's another avenue to explore. These businesses are run by staff and already have a proven system, marketing and sales. We would say you have to be super rich to tackle this one. Are You?
- (3.) Another easy solution to add to your income is to **go back to school, get another certification or advanced degree and job hop over your boss** or manager to another company. I've seen friends and family do this one a lot. With that advanced education you could get a raise, more benefits and maybe some bonuses you didn't have before. Maybe a better retirement plan at that new company.

(4.) There are only 4 ways to make money and we have already discussed 3 of them. 1. Being an employee. 2. Being self employed. 3. Owning a business like a McDonalds or Dunkin Donuts or other large proven franchise. The 4th area to make money from your investments.

YOUR financial advisor or financial consultant or pension consultant or CFP or CPA or Realtor or whoever you use to consult with has a plethora of ideas to diversify your money or income and retirement savings. These Other money professionals have a variety of baskets to place your money.

From fixed investments to equity investments to real estate, you have choices to help your basket of income tools. ALL of them come with great risk. Be aware. Be Astute.

The choices you make with your money AND what professional to use to guide you in making these important decisions can make or break your next pandemic or own personal financial crisis.

Good advice: Don't rush into ANY financial vehicle or investment. It is ok to take "some" time to educate yourself with trained professionals who will allow you to learn about them and their variety of choices for you to be able to make an informed decision.

Everyone is not a fit for everything. Yes or yes? **With this number four category, there are NO guarantees, there can be tremendous volatility, potential cash flow challenges and the possibility of profits, maybe.**

All this sound good? **You can't go into this number 4 blind. That is all I am saying. Make sense?**

- (5.) Number five We recommend you read **the book, Business of the 21st Century, Author, Robert Kiyosaki.** The 1st 20 pages really can help **your entrepreneurial mindset** to give you possible choices for your future. You will not use all of these 10 dos and don'ts but this one We personally think you might want to explore. **Get a copy for yourself on Amazon** and have it shipped directly to your home. **After you read the first 20 pages, reach out to me and let's chat about it.** Text or call us @ 561-302-0051 or 561-302-5760. Find us on our social media @ **www.PaulFinkelstein.com**

(6.) 9 of my do's and don'ts **We STRONGLY recommend you maintain or implement right away is having 24-48 months of monthly expenses in CASH as your backup.** You will thank us later for sure.

(7.) **Credit cards: AVOID AVOID AVOID.** Credit cards are a necessary in today's world and it is ok to use them as long as you pay off your balances in full each month. Otherwise, they can be a disaster.

(8.) Other loans. AVOID AVOID AVOID. ONLY in specific circumstances that you have lots of cash flow and business sales and profits way above your loan amount. This tool is a way to use a banks money and not your own. It's leverage. **So avoid avoid avoid. But EVERYTHING has a risk attached to it.**

(9.) Home office or rent an office? To have overhead or equipment or employees? Or Not. **If you have number 6 in order and other credentials in order, maybe.**

(10.) Bootstrap or word of mouth marketing or ANY marketing: You will want to do 10% to 30% of your budget in marketing a business. You will need to do ALL the time. When your business is slow and when it is pouring profits. You will need a lead generation system or program. Got one? **How long have you been in marketing?**
What has been your experience with marketing?
How is it currently working?
What do you do now for your advertising, public relations or marketing currently?

Finally, what lesson did Covid-19 or the Coronavirus teach YOU?
